

АДМИНКА / OPEN API

Работает в «Подсказках» 23.3+

<http://сервер:8080/suggestions/openapi/swagger-ui/index.html>

Страница содержит спецификацию Open API для «Подсказок»:

The screenshot shows the Swagger UI interface for the 'suggestions-controller' API. At the top, there's a Swagger logo and a search bar containing '/suggestions/openapi/schema' with an 'Explore' button. Below this, it says 'OpenAPI definition' with a 'v0.0.0' version tag and a 'QAS3' label. A 'Servers' section shows a single server URL: 'http://127.0.0.1:8080/suggestions - Generated server url'. The main part of the interface is a list of API endpoints under the 'suggestions-controller' heading. Each endpoint is a POST request to a specific path, with a dropdown arrow to its right. The endpoints are:

- POST /api/a_1/rs/findAffiliated/party
- POST /api/a_1/rs/findByEmail/company
- POST /api/a_1/rs/findById/{name}
- POST /api/a_1/rs/findById/address
- POST /api/a_1/rs/findById/bank
- POST /api/a_1/rs/findById/fias
- POST /api/a_1/rs/findById/party
- POST /api/a_1/rs/geolocate/{name}
- POST /api/a_1/rs/geolocate/address
- POST /api/a_1/rs/lplocate/address
- POST /api/a_1/rs/suggest/{name}
- POST /api/a_1/rs/suggest/address
- POST /api/a_1/rs/suggest/bank
- POST /api/a_1/rs/suggest/email
- POST /api/a_1/rs/suggest/fias
- POST /api/a_1/rs/suggest/fio
- POST /api/a_1/rs/suggest/party
